2023 THEME CAMP THEMES

Sharks `n Minnows	Beginner intermediate and experienced swimmers welcome! With the help of dedicated YMCA swim instructors your camper will receive four swim lessons that fit their current skills.	Lost in Space	3,2,1...BLAST OFF! Future astronauts, engineers, and scientists unite this week as we take a journey through space! Our campers will get lost in the stars and create their own constellations, learn about the solar system and how the planets orbit the sun, create moon rocks, and design their own space rocket!
Olympiad	This week our campers find themselves among the gods and goddesses of Ancient Greece learning about the first Olympic traditions. The Olympians will spend the week learning about the country their camp is representing for the Olympic games as well as creating flags and banners to support their country at	Creepy Crawlers	Calling all entomologists! Campers will study a few of the one million species of insects, their life cycles, and how they benefit the world we live in. Our entomologists will re-create a butterfly's life cycle, explore spiders and their elaborate webs, and discover how bees eat pollen.
Time Travelers	Step into our time machine and take a trip through history. Our time travelers will roam with the dinosaurs, sit and feast with the Romans, say good day to the Renaissance, land on the moon and take one small step for humankind, and end the week with a milkshake at the sock hop.	Music Makers	This is my favorite song! Turn it up! Whether our rising stars decide to come together to form a band or become solo artists, they will have the opportunity to show off their musical talent this week. Activities will include opportunities to create their own instruments, practice their stage presence, and discover music superstars of past and present.
Mad Scientists	How far away is the sun? How are rainbows made? How do airplanes fly? How do arctic animals stay warm in the icy water? Grab your lab coats and goggles for a week of discovering the world of science. Our junior scientists will participate in hands-on experiments that answer the many questions of "how?", while learning about the scientists that have helped change our daily lives.	Culinary Creatives	Grab your apron and your toque because things are about to get messy! This week campers will be encouraged to expand their minds and taste buds while following recipes to make healthy snacks. In addition to getting messy with ingredients, activities will include exploring food groups, learning about the benefits of healthy eating, and our very own "Top Chef" competition of healthy snacks.
LEGO Mania	LEGO enthusiasts, this week is for you! Campers will participate in exciting LEGO activities that will promote creativity, encourage engineering skills, and build relationships. Activities will include a marble maze, LEGO wind racers and a wrecking ball challenge.	Camp's Got Talent	Welcome to Camp's got Talent! Campers will practice and prepare their self-chosen talent through the week to showcase on the biggest night of them all, the Talent Show!
Crack The Code	Calling all top spy agents. I repeat, calling all top spy agents. We need you to crack the code and help get the answers we need; the site depends on you. The week will include an opportunity for our agents to work together to create an invisible code for other campers to solve, venture through a laser maze, create a hand scanner, and decode the site's hidden secret.
